### CHILDREN'S PROGRESS

#### MOST RECENT DATA ANALYSIS FEBRUARY 2019

At our most recent analysis, noticeable progress was made in all areas of development across the whole nursery, including an 8% increase in girls developing above age related expectations in moving & handling and a 2% increase in progress in listening & attention & shape, space & measure in boys.

We have recently updated an action of plan of what we intend to implement in order to support the children in progressing further. You will also see parent challenges set by your child/ren's room & management in support of this.

NEXT DATA ANALYSIS DUE JUNE 2019

### MESSAGE FROM CENTRAL SUPPORT

We are currently undertaking training to enable us to have PANCo's in each of our nurseries. These are Physical Activity and Nutrition coordinators. The introduction of these coordinators will enable us to further improve the provision for physical activity, support parents to understand the importance of physical activity and further build on our already outstanding nutritional meals. We look forward to working with you on these new projects and would like to thank you in advance for your support.
